Emeron Infospace is a pioneering technology company dedicated to delivering cutting-edge business solutions that empower organizations to thrive in the digital era. With a strong focus on innovation, efficiency, and scalability, we provide businesses with the tools they need to streamline operations, improve decision-making, and drive growth.

Our flagship product, Emeron ERP, is an all-in-one business management software designed to simplify complex processes—from accounting and inventory management to customer relations and project tracking. By integrating all essential business functions into a single, easy-to-use platform, Emeron ERP enables companies to operate smarter, faster, and more effectively.

## Our Mission

---

# Transforming Businesses with Innovation, Efficiency, and Scalability

At Emeron, our mission is to redefine business efficiency by delivering innovative, scalable, and user-friendly solutions that simplify operations and drive growth. We are committed to providing cutting-edge technology that enables businesses to streamline processes, make data-driven decisions, and stay ahead in a competitive market.

By combining automation, flexibility, and seamless integration, we empower organizations to focus on what truly matters—innovation, customer satisfaction, and long-term success.

# What is Emeron ERP?

Emeron ERP is a powerful business management software designed to help companies stay on top of their operations—whether it's tracking inventory, managing finances, handling projects, or improving customer relationships. Think of it as the central nervous system of your business, bringing everything together in one seamless platform.

# Why Choose Emeron ERP?

Because running a business is already hard enough—your ERP shouldn't make it harder. With Emeron ERP, you get a complete suite of tools built for all your business needs, right out of the box:

- **All-in-One Solution** – From accounting to inventory management, everything you need is integrated.
- **User-Friendly Interface** – A modern, intuitive design that doesn't feel outdated.
- **Mobile-Friendly** – Manage business anytime, anywhere.
- **Customizable** – Tailor forms, reports, and dashboards.
- **Approval Workflows** – Streamline operations with automated approvals.
- **Role-Based Access** – Secure data with granular permissions.
- **API-First** – Seamlessly integrate with third-party systems.

Whether you're a small business or a growing enterprise, Emeron ERP helps you stay organized, automate repetitive tasks, and focus on what truly matters—running your business.

# Key Features

## **Comprehensive Financial Management**

Track income, expenses, invoices, and payments with real-time financial insights for better decision-making.

## **Advanced Inventory Control**

Monitor stock levels, manage warehouses, and automate reordering to prevent shortages or overstocking.

## **Integrated Sales & CRM**

Manage customer relationships, track leads, generate quotations, and convert opportunities into sales seamlessly.

## **Smart HR & Payroll System**

Handle employee records, attendance, leave, and payroll processing with automated calculations and compliance tracking.

## **Project & Task Management**

Assign, track, and collaborate on projects efficiently with real-time updates and progress monitoring.

## **Procurement & Supplier Management**

Streamline purchase orders, vendor relationships, and supplier contracts to optimize procurement processes.

## **Advanced Reporting & Analytics**

Generate customizable reports and gain actionable insights into business performance and key metrics.

## **Multi-Branch & Multi-Currency Support**

Manage multiple locations, handle different currencies, and ensure smooth global operations.

## **Scalable & Customizable Platform**

Open-source flexibility allows businesses to tailor the ERP system to their unique operational needs.

Emeron ERP

---

# Powering Business Efficiency

Emeron ERP is a comprehensive and scalable business management solution designed to streamline operations, automate processes, and enhance decision-making. With integrated tools for finance, inventory, sales, HR, and project management, Emeron ERP helps businesses of all sizes optimize efficiency, reduce manual work, and drive sustainable growth.

# Why Should Businesses Use an ERP?

In today's fast-paced business environment, even small and medium-sized enterprises (SMEs) face challenges similar to those of large corporations—tracking resources, managing finances, handling payroll, and ensuring customer satisfaction. However, SMEs often lack the financial resources to invest in expensive enterprise solutions like SAP, leaving them struggling with fragmented tools such as spreadsheets and standalone accounting software.

Without an integrated system, businesses must navigate multiple applications just to access customer data, monitor cash flow, or track profitability. This siloed approach limits growth, increases inefficiency, and forces businesses to react rather than proactively manage operations.

## How Emeron ERP Solves These Challenges

Emeron ERP is designed to bridge this gap, offering SMEs and large enterprises an affordable, scalable, and feature-rich ERP solution that simplifies business management.

- **Affordability** – Budget-friendly ERP solution.
- **Comprehensive** – Covers all core business functions, from finance to inventory and CRM.
- **Customizable** – Easily adaptable to specific business needs.
- **Efficient** – Low computing requirements make it cost-effective to host and manage.
- **Integrated** – A single, unified system where multiple users can collaborate seamlessly.

# ERP Solutions for Every Industry

Emeron ERP is a versatile and scalable solution designed to meet the unique needs of businesses across diverse industries. Whether you are managing complex manufacturing operations or providing essential services in healthcare, Emeron ERP enables you to simplify operations, optimize resources, and drive growth with ease.

## Manufacturing

Streamline production, manage inventory, and ensure timely delivery with precise control over your manufacturing processes.

## Education

Streamline student admissions, course management, and fee tracking in a single platform to improve operational efficiency.

## Trading & Distribution

Manage procurement, track orders, and efficiently optimize supply chains to ensure smooth and timely operations

## Professional Services

Optimize project management, billing processes, and client collaboration to improve service delivery and profitability.

## Retail

Boost sales, manage stock levels, and enhance customer satisfaction by providing a seamless retail experience.

## Financial Services

Easily track finances, manage portfolios, and stay compliant with industry standards while ensuring robust data security.

## E-commerce

Simplify order management, track customer data, and boost online sales through centralized control.

## Healthcare

Efficiently manage patient records, appointments, and hospital operations to enhance patient care and service delivery.

## Engineering & Construction

Simplify order management, track customer data, and boost online sales through centralized control.

## Non-profit

Streamline fundraising efforts, donor management, and project execution to maximize your social impact.

# Modules of Emeron ERP

Emeron ERP offers a comprehensive suite of modules designed to streamline every aspect of your business. Whether you're managing finances, sales, inventory, or employees, our modules provide seamless integration and robust functionality to optimize your operations.

01

## Accounting

Manage your finances with ease. Track income, expenses, and generate financial statements to ensure compliance and informed decision-making.

02

## Procurement

Automate procurement processes, manage suppliers, and control inventory levels to optimize costs and improve supply chain efficiency.

03

## Sales

Boost your sales with efficient order management, customer tracking, and invoicing, all while ensuring smooth sales operations.

04

## CRM

Enhance customer relationships by managing contacts, tracking interactions, and automating marketing efforts to drive sales growth.

05

## Stock

Keep track of inventory levels, manage reordering, and optimize storage to avoid stockouts or overstocking, ensuring smooth business operations.

06

## Manufacturing

Streamline production processes, track work orders, manage resources, and ensure timely delivery with full visibility over your manufacturing operations.

07

## Projects

Efficiently manage projects, allocate resources, track progress, and stay on top of timelines and budgets for successful project delivery.

08

## Assets

Manage and track company assets—whether tangible or intangible—ensuring proper utilization and timely maintenance for better asset management.

09

## Point of Sale (POS)

Manage in-store sales, customer transactions, and stock in real-time with a fully integrated Point of Sale system that syncs with your ERP.

10

## Quality

Monitor product quality, manage inspections, and ensure compliance with industry standards, delivering high-quality products every time.

11

## Support

Track and resolve customer service requests, manage tickets, and ensure customer satisfaction with a streamlined support module.

12

## HR & Payroll

Simplify employee management, automate payroll, track attendance, and manage benefits and compensation with a complete HR solution.

# Accounting

## Manage Your Accounts Accurately with Emeron ERP

Emeron ERP simplifies financial management with a fully integrated system that ensures compliance, reduces manual effort, and provides real-time financial insights. Track and manage finances across multiple entities and currencies with ease.

- **Flexible Chart of Accounts:** Customize and organize ledgers to suit your business structure.
- **Comprehensive General Ledger:** Automate financial reporting and drill down into individual transactions.
- **Billing, Payables & Receivables:** Efficiently manage cash flow with invoicing, payments, and follow-ups.
- **Taxes & Compliance:** Stay compliant with automated tax calculations and e-invoicing integration.
- **Cost Centers & Budgeting:** Track profitability and prevent overspending with budgeting tools.
- **Financial Statements:** Generate real-time reports like Balance Sheets and Profit & Loss Statements.
- **Assets Management:** Track and manage assets with automated depreciation.
- **Account Reconciliation:** Easily match payments to invoices using reconciliation tools.
- **Multi-Company & Multi-Currency:** Manage multiple entities and currencies in one unified system.

# Procurement

## Procure, Receive, Pay & Manage Suppliers Efficiently with Emeron ERP

Purchases are a major business expense, and poor management can impact cash flow and profitability. Emeron ERP streamlines your entire procurement process—from material requests to invoicing—while ensuring budget compliance.

- **Automate Procurement** – Raise material requests across departments, ensuring timely purchasing and reducing manual follow-ups.
- **Auto Stock Replenishment** – AI-driven reordering compares stock levels with set thresholds to prevent shortages.
- **Request for Quotation (RFQ)** – Streamline supplier quotations through an integrated portal, reducing communication delays.
- **Compare Supplier Quotes** – Easily analyze and compare quotations to negotiate better deals and optimize costs.
- **Centralized Purchase Orders** – Standardize procurement with structured Purchase Orders for better tracking and efficiency.
- **Receive & Track Goods** – Monitor deliveries, conduct quality checks, and maintain accurate stock records.
- **Manage Payables & Payments** – Automate invoicing, track accounts payable, and simplify bulk payments to suppliers.
- **Advanced Analytics** – Gain insights into purchasing trends, supplier performance, and budget compliance with detailed reports.

# Sales

## Streamline Sales, Accelerate Growth.

Emeron ERP optimizes your sales process from lead generation to final payment. With an integrated CRM, automated quotations, and seamless order management, you can close deals faster and improve cash flow.

- **Professional Quotations** – Quickly create and send well-structured, competitive proposals with pre-configured templates, reducing turnaround time.
- **Fast Order-to-Cash Cycle** – Manage the entire sales process efficiently, from order placement to stock allocation, delivery, and invoicing.
- **Automated Pricing Rules** – Set dynamic pricing and discounts that automatically apply to orders, ensuring consistent and optimized sales strategies.
- **Blanket Orders for Contracts** – Secure long-term customer commitments with predefined rates and quantities, ensuring smooth recurring transactions.
- **Timely Payment Collection** – Monitor receivables, track overdue payments, and send automated reminders via email or messaging apps for faster collections.

# CRM

## Close More Deals with a Smarter CRM.

Emeron ERP's CRM streamlines sales with advanced tools to track leads, manage customer interactions, and drive conversions. With automated lead capture, pipeline visibility, and campaign management, your team stays focused on closing more deals efficiently.

- **Lead Capture from Multiple Sources** – Automatically collect leads from emails, websites, and marketing campaigns to ensure no opportunity is missed.
- **Sales Pipeline Visibility** – Get real-time insights into your pipeline, helping you prioritize leads and increase conversion rates.
- **Lead Nurturing & Opportunity Management** – Seamlessly convert leads into opportunities while tracking key details to drive strategic sales decisions.
- **Centralized Communication** – Keep all customer interactions, emails, and follow-ups organized in one place for seamless engagement.
- **Campaign Tracking & Analysis** – Create and monitor multiple marketing campaigns, linking them to leads and opportunities for better performance insights.
- **Email Group Management & Newsletters** – Organize customer lists and run targeted email campaigns with an easy-to-use editor and compliance tools.
- **Sales Team Performance Monitoring** – Analyze team efficiency with built-in reports, track sales progress, and optimize workflow collaboration.

# Stock

A Complete Inventory Management System for 100% Visibility and Efficiency.

Emeron ERP's inventory management system streamlines stock control with centralized item tracking, automated replenishment, and real-time reporting. Designed for retail, distribution, and manufacturing businesses, it ensures efficient stock movement, accurate valuation, and seamless order fulfillment.

- **Centralized Item Master** – Organize products under structured categories, prevent duplication, and streamline stock tracking for improved inventory accuracy.
- **Flexible Warehouses** – Manage multiple warehouses with a structured hierarchy, including sub-locations, for seamless inventory control.
- **Automated Stock Replenishment** – Prevent stockouts by setting reorder levels and automating material requests based on demand forecasts.
- **Optimized Order Fulfillment** – Reserve stock for specific orders to avoid conflicts and ensure timely delivery to customers.
- **Accurate Stock Reconciliation** – Align system records with physical inventory through regular stock checks and adjustments.
- **Putaway and Pick List Management** – Optimize warehouse organization and speed up order picking with intelligent location assignments.
- **Serialized & Batched Inventory** – Track individual items with serial numbers and batch details, ensuring warranty management and expiry compliance.
- **Comprehensive Stock Reports** – Gain insights into stock aging, movement trends, and valuation with detailed real-time reports for better decision-making.

# Manufacturing

Get 100% Visibility and Traceability  
in Your Manufacturing Process.

Emeron ERP's manufacturing module offers end-to-end visibility into production workflows, from multi-level BOM tracking to subcontracting and capacity planning. Integrated with sales and stock, it ensures seamless production planning, accurate cost estimation, and optimized resource allocation.

- **Bill of Materials (BOM) Management** – Define raw materials, operations, and costs to maintain structured and accurate production records.
- **Production Planning** – Align production schedules with material availability, customer deadlines, and work orders for seamless execution.
- **Work Order Management** – Centralize manufacturing directives, trigger raw material transfers, generate job cards, and track production progress.
- **Capacity Planning** – Optimize workstation workloads to improve efficiency, reduce downtime, and meet delivery commitments.
- **Subcontracting Management** – Track subcontracted items, manage supplier relationships, and streamline order execution.
- **Automated Subcontracting Orders & Billing** – Ensure smooth material transfers, accurate consumption tracking, and seamless financial reconciliation.
- **Real-time Manufacturing Reports & Dashboards** – Gain instant insights into production performance, raw material usage, and order fulfillment.

# Project

Monitor Project-Level Profitability with Integrated Accounting Capabilities.

Emeron ERP's Project Management module streamlines project tracking by linking tasks, expenses, inventories, and timesheets to ensure profitability and customer satisfaction. With real-time progress tracking, Gantt charts, and customizable customer portals, your projects stay on time, within budget, and aligned with your financial goals.

- **Track Project Completion** – Centralize all project-related information including tasks, timesheets, sales, and purchases, ensuring transparency and improved coordination.
- **Task and Deadline Management** – Assign clear responsibilities, monitor task deadlines, and visualize dependencies through Gantt and Kanban views to maintain accountability.
- **Map Expenses, Invoices, and Timesheets** – Attach expenses, timesheets, and invoices to specific projects to track profitability, and generate insights into cost versus billing.
- **Track Project-Level Inventories and Assets** – Monitor inventory across multiple locations, tag warehouses to specific project locations, and streamline asset management.
- **Customer Project Visibility** – Provide customers with a transparent view of project progress via a customizable portal, enhancing communication and reducing delays.

# Asset

## Manage Asset Lifecycle from Acquisition to Retirement, with Ease.

Emeron ERP simplifies asset management, offering seamless tracking of assets from procurement to disposal. Whether handling IT infrastructure, machinery, or equipment, our solution helps streamline the entire asset lifecycle. With automated depreciation, asset tracking, reporting, and easy customizations, managing your assets has never been simpler.

- **Manage Asset Lifecycle** – Oversee the entire asset lifecycle from acquisition to retirement with automated tracking and reporting, ensuring maximum value and compliance.
- **Track Inventory Details of Assets** – Manage asset information like batch numbers, serials, and locations with barcode scanning for quick updates and decision-making.
- **Procure Assets with Ease** – Procure new assets with a few clicks, automatically generating asset records and updating depreciation schedules, insurance, and more.
- **Sell Assets** – Effortlessly sell assets by auto-generating journal entries and eliminating the need for manual accounting updates.
- **Automate Asset Depreciation** – Streamline asset depreciation with automated calculations and schedules, ensuring accurate financial records without manual intervention.
- **Scrap Assets** – When assets reach their end-of-life, scrap them with one click, with accounting entries automatically handled.
- **Asset Value Adjustment** – Adjust asset values for fluctuations and update depreciation with automatic journal entries and recalculations.
- **Asset Reporting** – Generate pre-built or custom reports to track performance, identify bottlenecks, and make informed decisions.
- **On-the-Fly Customizations** – Tailor your asset management system to your needs with custom fields, forms, and print formats, all without writing any code.

# POS

## Simple and User-Friendly POS to Manage Your Retail Business.

Emeron ERP's POS solution combines ease of use with powerful ERP features, streamlining your retail business operations. With intuitive, touchscreen-friendly interfaces, quick item lookup, and seamless billing, our POS system ensures faster transactions, better inventory management, and efficient shift closures, empowering you to manage multiple stores effortlessly.

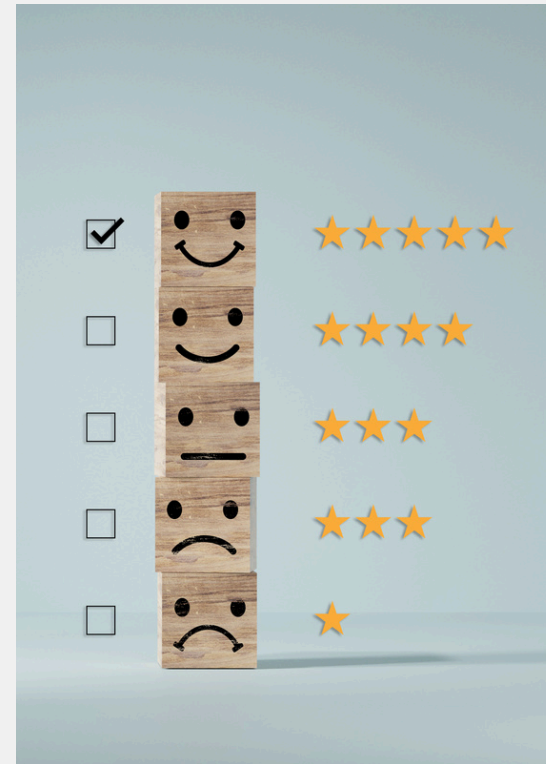

- **Create Items and Prices** – Easily create and manage item catalogs, assign barcodes for fast retrieval, and set store-specific prices for accurate billing across locations.
- **Create Multiple Stores in a Few Clicks** – Set up multiple stores with dedicated warehouses and real-time stock tracking, ensuring smooth operations and centralized control across your retail network.
- **Manage Billing Counters** – Assign dedicated POS users to each billing counter, automate customer details, warehouse selection, payment methods, and even apply promotional discounts or loyalty points during billing.
- **Collection and POS Invoice** – Handle multiple payment modes, ensure accurate change calculations, and generate professional invoices with a pre-defined print format for quick, smooth transactions.
- **Shift Opening and Closing** – Automatically generate a consolidated daily sales invoice, track POS transactions, and update collection details during shift closure for accurate accounting.

# Quality

## Deliver the Highest-Quality Products, Consistently.

Emeron ERP's Quality Management module ensures excellence at every step. By setting clear quality goals, reviewing processes regularly, and fostering accountability, our system enables you to maintain the highest standards across your business. Proactively track performance, review results, and take corrective actions to ensure your company consistently delivers superior products and services.

- **Quality Procedures** – Establish clear quality goals and procedures for each department, creating a foundation for standard operating procedures (SOPs) that ensure all team members follow consistent practices.
- **Quality Review and Action** – Conduct detailed reviews to assess products, services, or processes against set quality standards. Initiate corrective and preventive actions within the system based on these reviews to address non-compliances early.
- **Quality Meetings** – Organize and track quality review meetings with agenda-setting, attendee tracking, minute capturing, and action item follow-ups, ensuring thorough documentation and accountability for improvements.
- **Quality Feedback** – Collect and manage quality feedback through standardized templates, enabling easy gathering of insights and suggestions to refine products and services, enhancing customer satisfaction and continuous improvement.

# Support

## A Self-Service Support Portal to Increase Customer Satisfaction.

Emeron ERP's Support module streamlines customer service by centralizing ticket management, automating workflows, and providing real-time insights. With features like automated ticket assignments, SLA tracking, and a self-service portal, businesses can deliver exceptional customer support and maintain high satisfaction levels.

- **Manage Customer Tickets Across Multiple Channels** – Centralize support tickets from calls, emails, and chats in one platform, reducing response times and enhancing team efficiency.
- **Automate Ticket Assignments** – Set up automatic ticket distribution rules such as round-robin or load balancing, ensuring an even workload across your support team for faster resolutions.
- **Track SLAs for Timely Resolutions** – Monitor response and resolution times with SLA tracking to ensure support teams meet targets and address issues promptly.
- **Monitor Team Performance with Detailed Reports** – Gain insights into team performance with reports like Support Hour Distribution and First Response Time for Issues, helping to improve customer service outcomes.
- **Empower Customers with Self-Service Portals** – Offer customers the ability to log, track, and manage their support tickets independently, streamlining communication and improving customer satisfaction.
- **Reduce Ticket Load with a Knowledge Base** – Provide a repository of FAQs and "How-To" articles that help customers solve issues on their own, reducing the overall ticket load and improving efficiency.
- **Schedule and Track Maintenance Visits** – Plan and track service visits seamlessly, capturing all details for better service delivery and consistent maintenance support.

# HR & Payroll

Empower Your Workforce: Streamline Recruitment, Employee Lifecycle, Payroll & More.

Emeron ERP's HR module simplifies HR management from recruitment to payroll. Streamline the entire employee lifecycle, manage attendance, leave, expenses, performance, and payroll—all in one place. With powerful tools for recruitment, employee development, and mobile access, managing your workforce has never been easier.

- **Recruitment** – Plan, publish, analyze, engage, evaluate, and hire with ease, ensuring that you find the best talent for your organization.
- **Employee Lifecycle** – Manage every stage of the employee journey, from onboarding to exits, transfers, promotions, and more, ensuring smooth transitions across the board.
- **Shifts & Attendance** – Manage attendance with mobile check-ins, roster management, and automatic attendance tracking, all in real-time.
- **Leave Management** – Handle complex leave policies, holidays, and encashments, making leave management efficient and compliant.
- **Expense Management** – Simplify the management of payouts, advances, travel expenses, and accounting, ensuring a smooth workflow for finance teams.
- **Performance Management** – Plan goals, KRAs, create appraisals, and provide continuous feedback to help employees grow and align with company objectives.
- **Payroll** – Map diverse pay structures, manage employee loans, and ensure accurate payroll with integrated accounting features, all tailored to your business needs.
- **Payroll Tax & Reports** – Stay up to date with regional tax regulations, manage tax computations, and generate tax projection reports to stay informed and compliant.
